W10-P1: Move all routes under app into (demo) folder, and run Tour successfully

=> Chrome with code

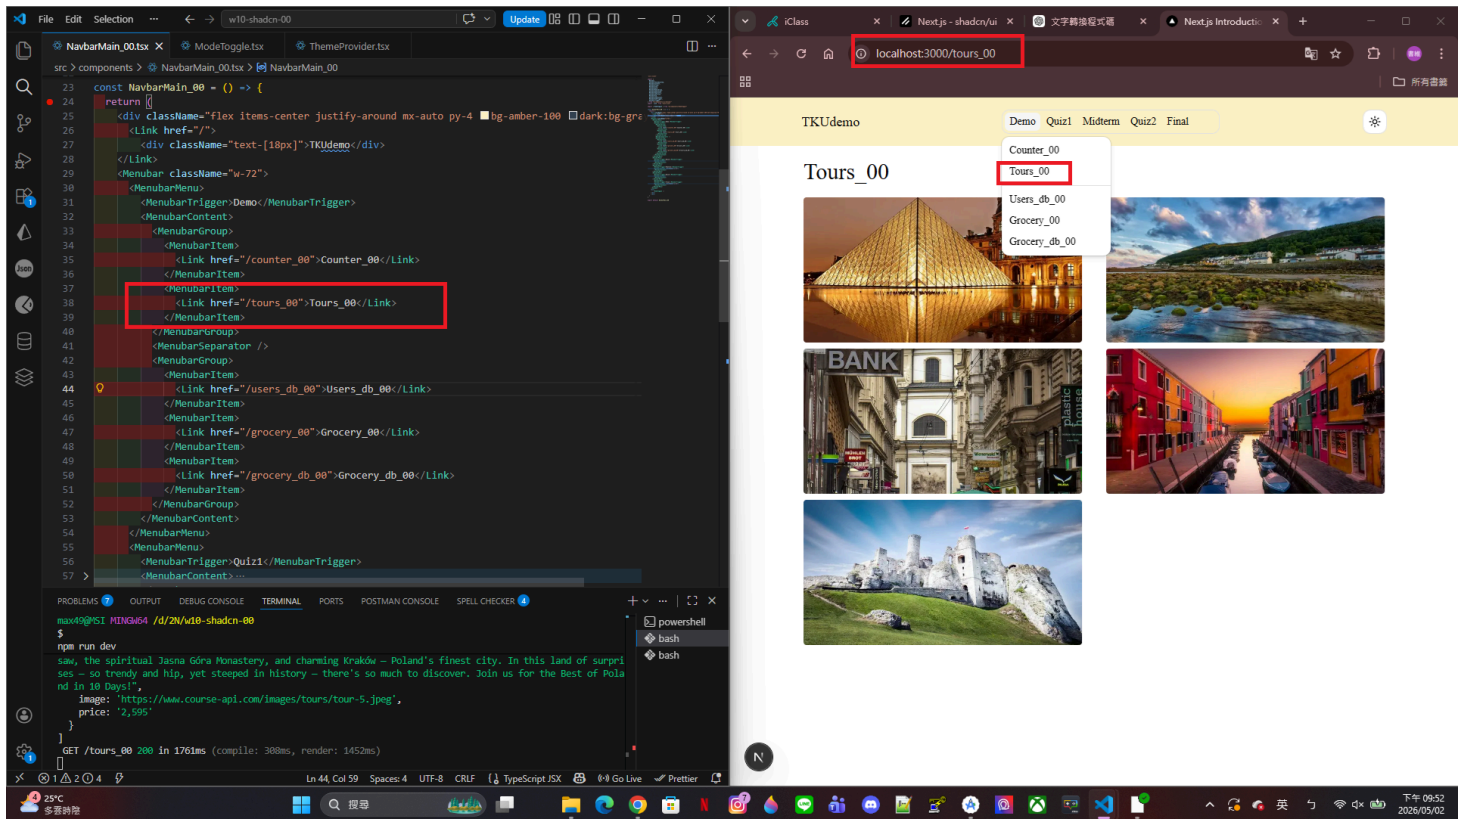

e6721c7 max920612 Wed Apr 29 18:52:26 2026 +0800 W10-P1: Move all routes under app into (demo)

W10-P2: Create NavBarMain_xx with 5 menubar and a ModeToggle that can change theme

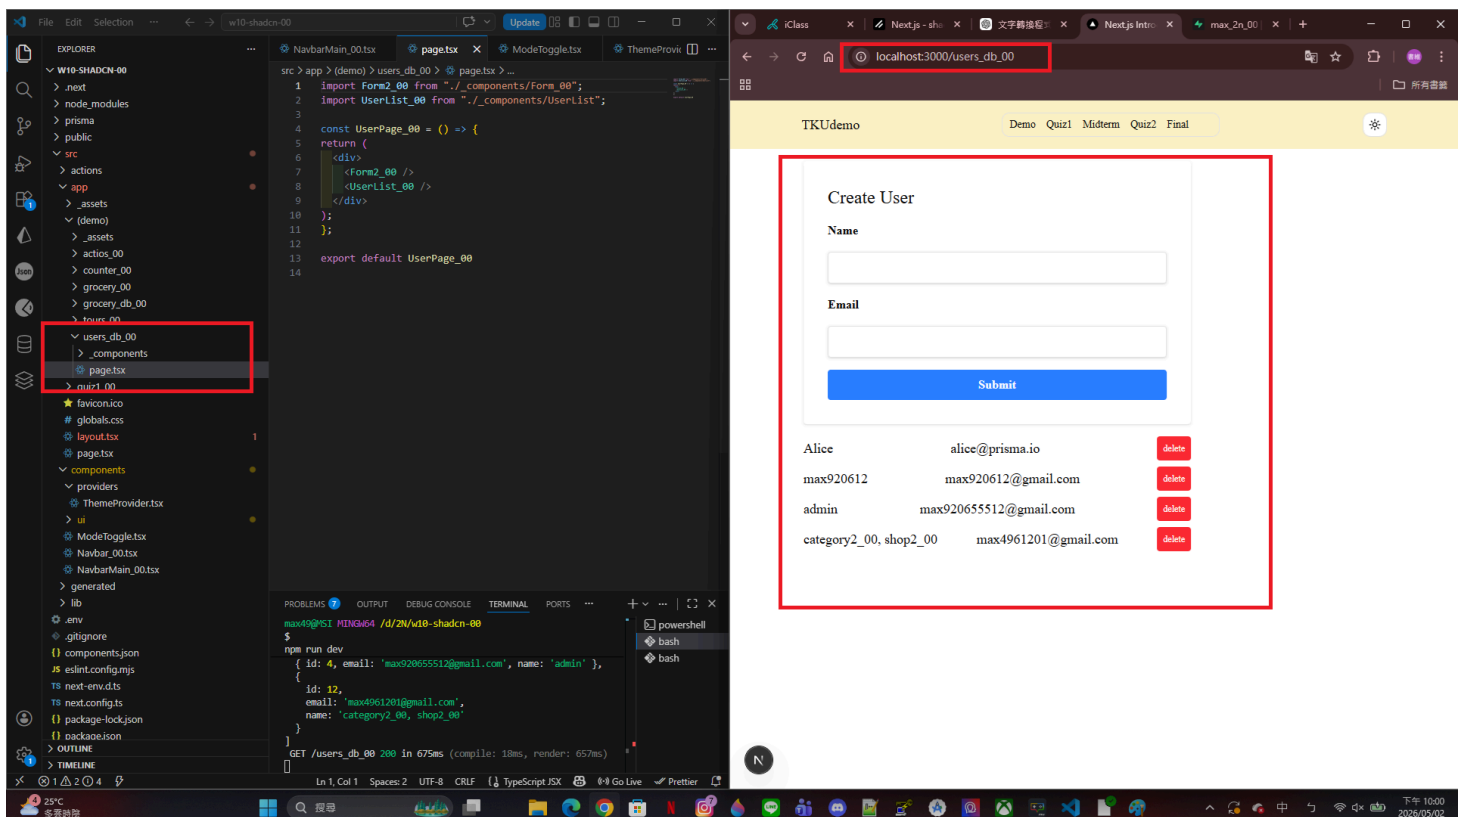

The screenshot shows the VS Code interface during the development of a Next.js application. The Explorer sidebar on the left lists the project files, with 'layout.tsx' highlighted under the 'src/app' directory. The main editor window displays the contents of 'layout.tsx'. The code defines the 'RootLayout' function, which sets up the page's metadata and renders the children within a 'ThemeProvider'. A red rectangular box highlights the entire 'RootLayout' function definition. At the bottom, the Output panel shows the terminal logs, confirming that all files were compiled successfully.

W10-P3: Implement Demo menubar with 5 items

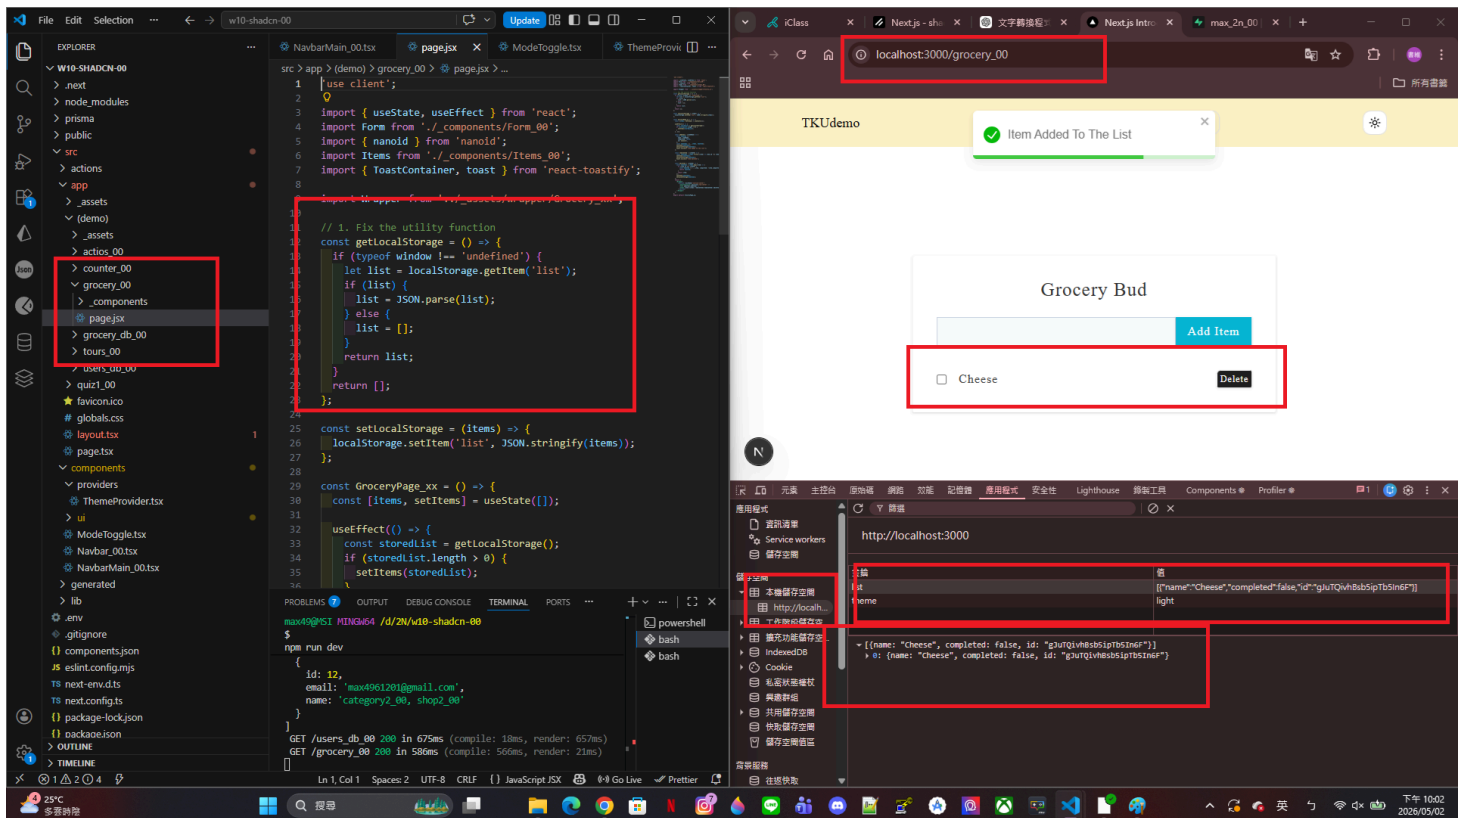

=> Show Tours_xx (local)

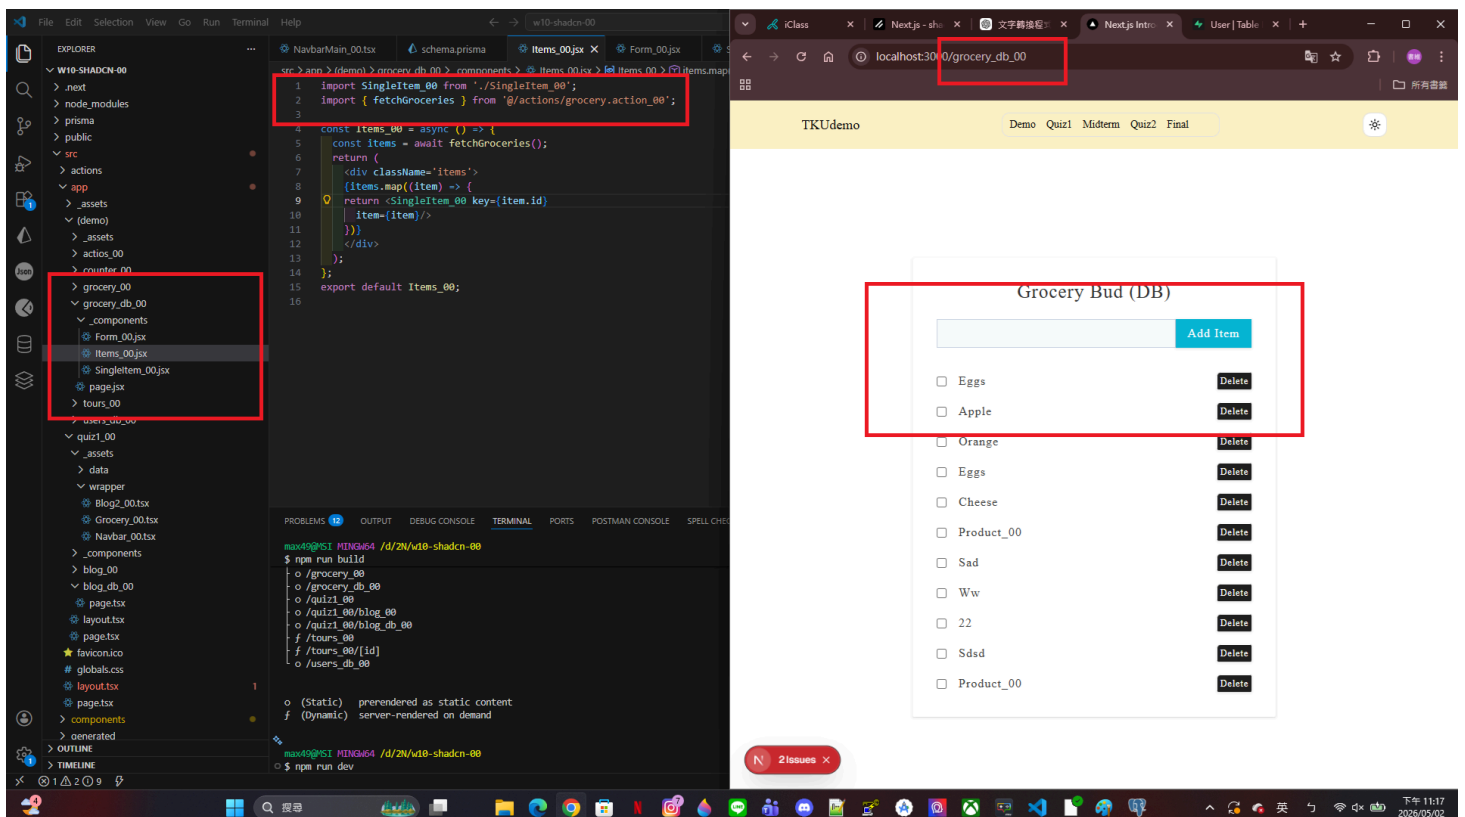

=> Show Users_db_xx (local)

=> Show Grocery_xx in Vercel

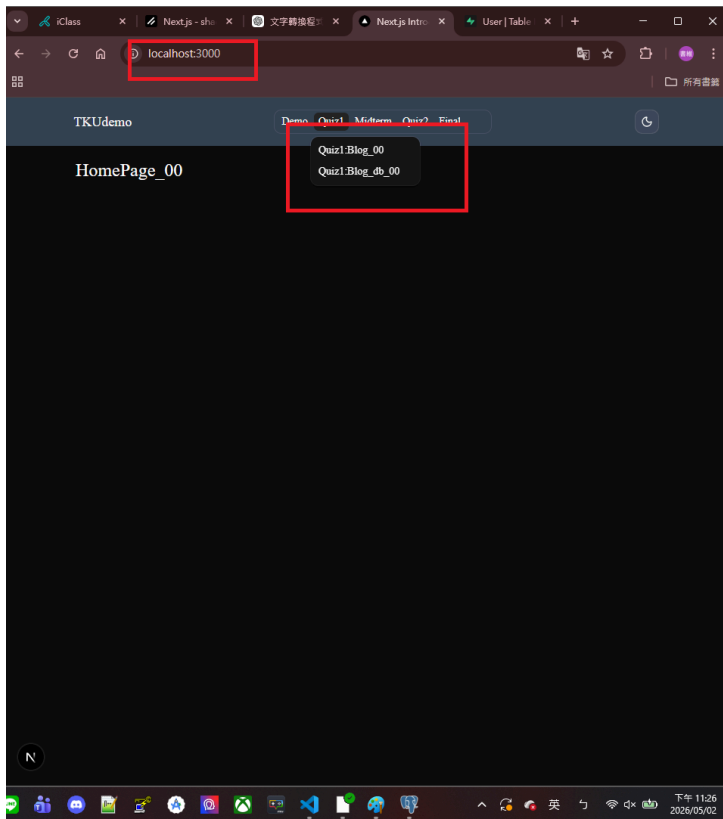

=> Show Grocery_db_xx in vercel

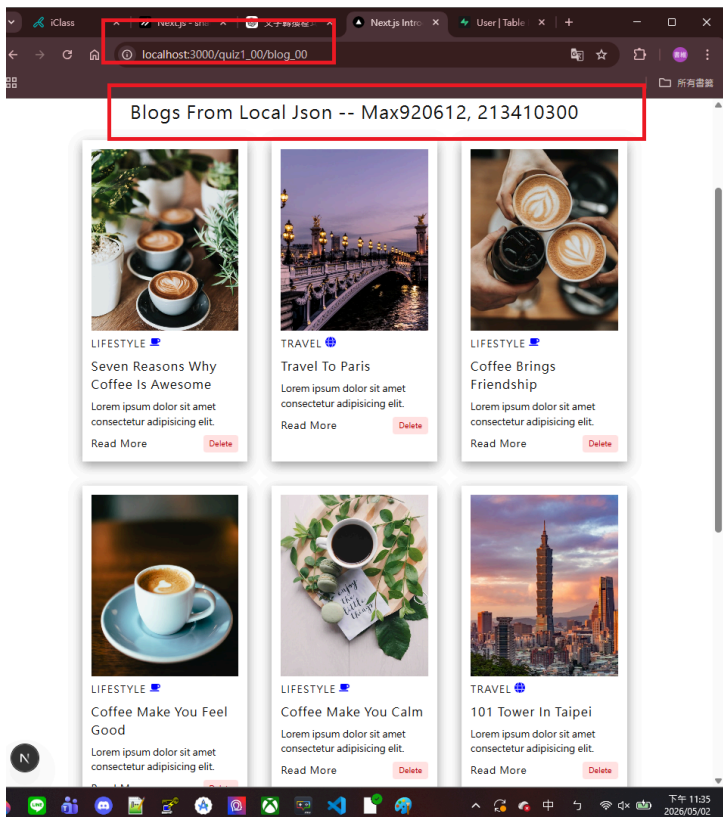

W10-P4: Implement Quiz1 menubar with 2 items

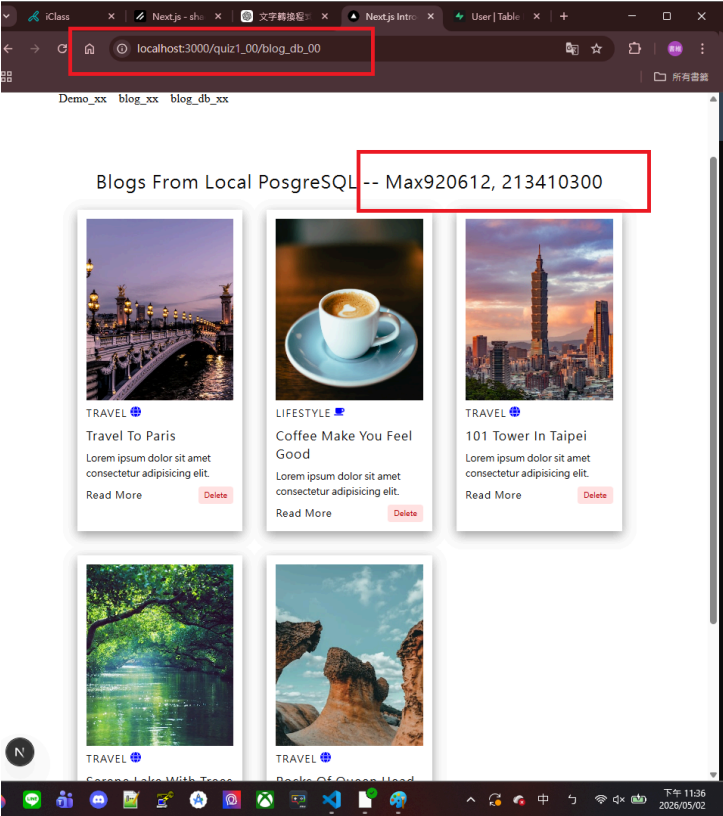

=> Show Quiz1 menubar in Vercel

=> Show blog_xx in Vercel

=> Show blog_db_xx in Vercel
