

W05-P1: Create a new Github repo and deploy to Vercel

=> "npm run build" with success

The screenshot shows the Visual Studio Code interface with a project named "1142-VERCEL-VICTORH...". The Explorer sidebar on the left shows the file structure, including folders like .next, node_modules, prisma, public, src, and app, and files like favicon.ico, globals.css, layout.tsx, page.tsx, components, generated, lib, .env, .gitignore, eslint.config.mjs, next-env.d.ts, next.config.ts, package-lock.json, package.json, postcss.config.mjs, prisma.config.ts, README.md, test.ts, and tsconfig.json. The file "users_db_43" is selected in the "app" folder.

The TERMINAL panel at the bottom shows the command "npm run build" being executed. The output indicates a successful build of Next.js 16.1.6 (Turbopack) in the environment ".env". The build process includes compiling, finishing TypeScript, collecting page data, generating static pages, and finalizing page optimization. A route summary for the "app" is also displayed:

```
Route (app)
├─ /
├─ /_not-found
├─ /tours_43
├─ /tours_43/[id]
└─ /users_db_43
```

Below the route summary, it indicates that static content is prerendered and dynamic content is server-rendered on demand.

The status bar at the bottom shows the current branch as "master" and indicates that an update is ready to be restarted.

=> Deploy to Vercel, add env variables

The image shows a VS Code editor on the left and the Vercel deployment interface on the right.

VS Code Editor:

- EXPLORER:** Shows the project structure with files like `.env`, `package.json`, and `tsconfig.json`.
- .env file:** Contains environment variables for database connections. The following lines are highlighted with a red box:

```
15 # Connect to Supabase via connection pooling
16 DATABASE_URL="postgresql://postgres.qxjwybaprfizyhiczbl
17
18 # Direct connection to the database. Used for migrati
19 DIRECT_URL="postgresql://postgres.qxjwybaprfizyhiczbl
20
```
- TERMINAL:** Shows the output of the `npm run build` command, indicating successful static page generation and optimization.

Vercel Deployment Interface:

- Application Preset:** Set to `Next.js`.
- Root Directory:** Set to `./`.
- Build and Output Settings:** Expanded section.
- Environment Variables:** A table with two rows, highlighted with a red box:

Key	Value
DATABASE_URL	abase.com:6543/postgres?pgbouncer=true
DIRECT_URL	ast-2.pooler.supabase.com:5432/postgres
- Buttons:** `+ Add More`, `Import .env`, and a large `Deploy` button.
- Deployment Section:** A message stating "Once you're ready, start deploying to see the progress here..."

=> Show users fetch from Supabase

The image shows a web browser displaying a web application. The address bar shows the URL: `1142-vercel-victorhsu-43-3dmrbieeg-vic0627s-projects.vercel.app`.

The application interface includes:

- Navigation Bar:** Links for `Home`, `Counter_43`, `Tours_43`, `Actions_43`, and `Users_db_43`.
- User List:** A list of two users:
 - `alice+1774161862878@prisma.io`
 - `alice+1774161925115@prisma.io`

=> Github repo with Vercel link

The screenshot shows the GitHub interface for a repository named '1142-vercel-victorhsu-43' by user 'vic0627'. The repository is a public repository with 0 stars, 0 forks, and 0 watchers. It has 1 branch and 0 tags. The repository name is highlighted with a red box. The URL '1142-vercel-victorhsu-43.vercel.app' is visible. The repository is currently on the 'master' branch. The commit history shows a commit by 'vic0627' (幹) with the message '6896cda · 4 minutes ago'.
