W10-P1: Move all routes under app into (demo) folder, and run Tour successfully

=> Chrome with code

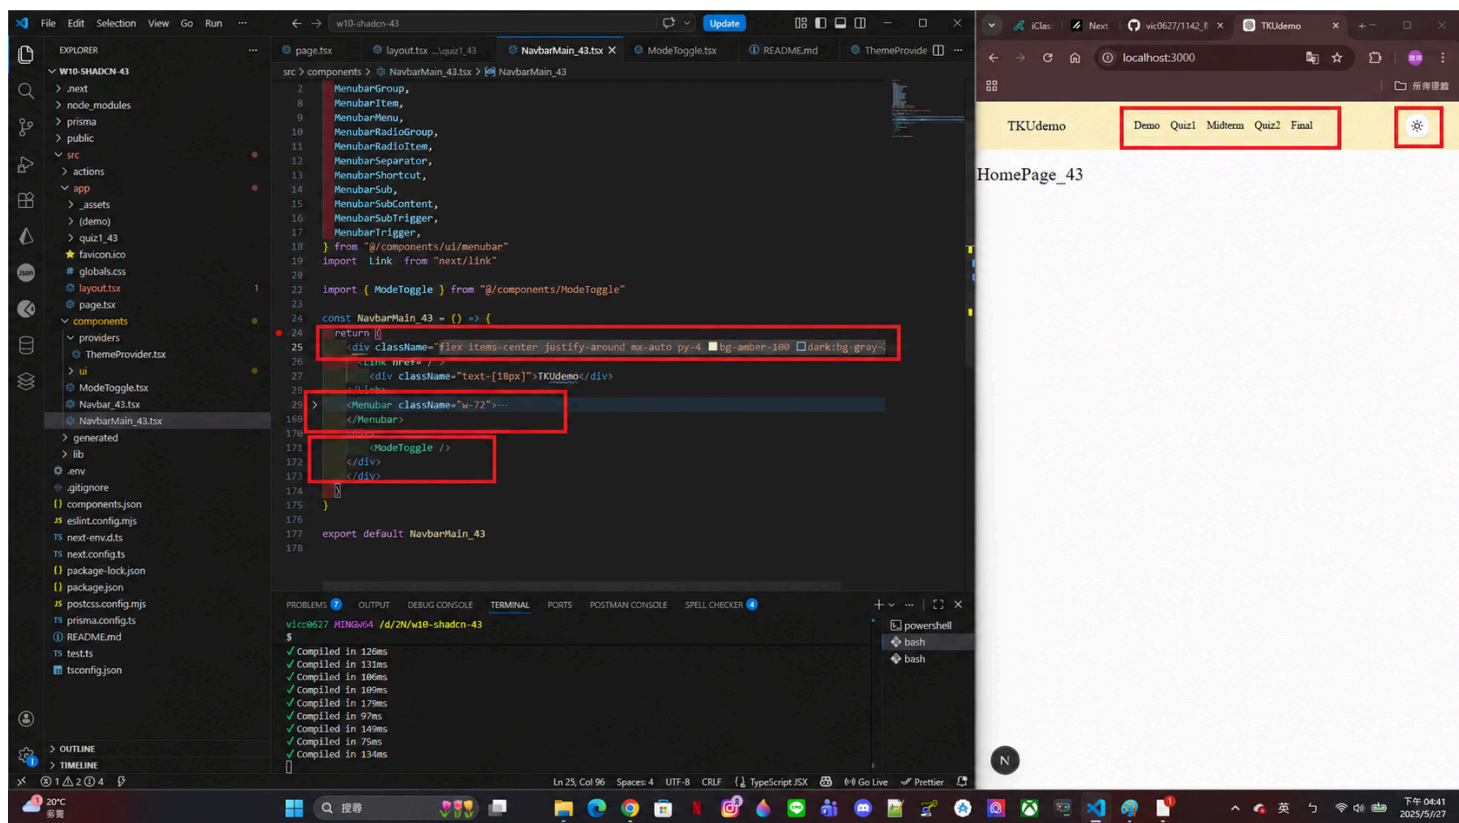

1f8d271 victor hsu

Thu Apr 30 16:43:19 2026 +0800

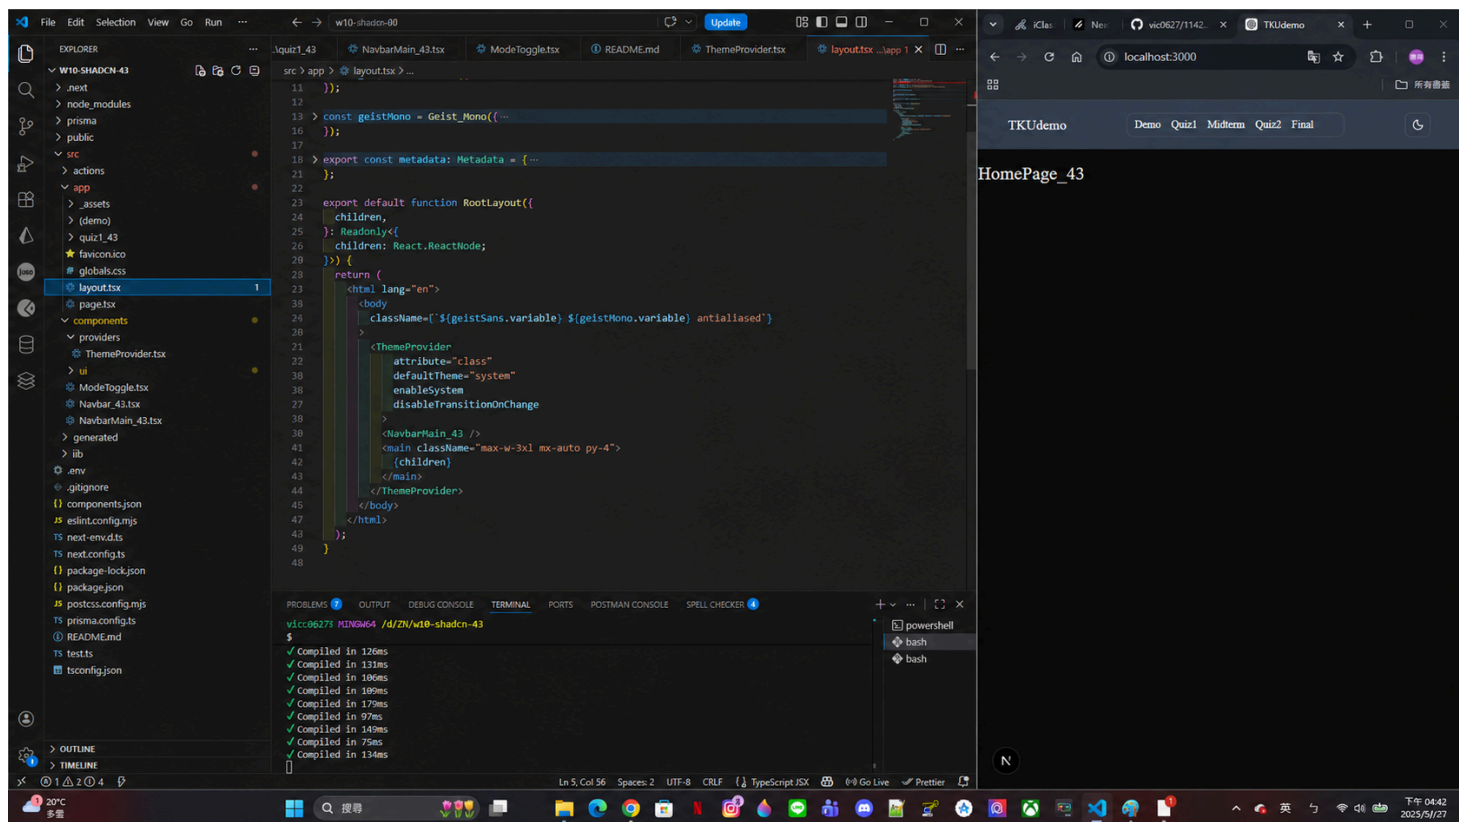

W10-P1: Move all routes

W10-P2: Create NavbarMain_43 with 5 menubar and a ModeToggle that can change theme

=> light mode, code for NavBarMain_43

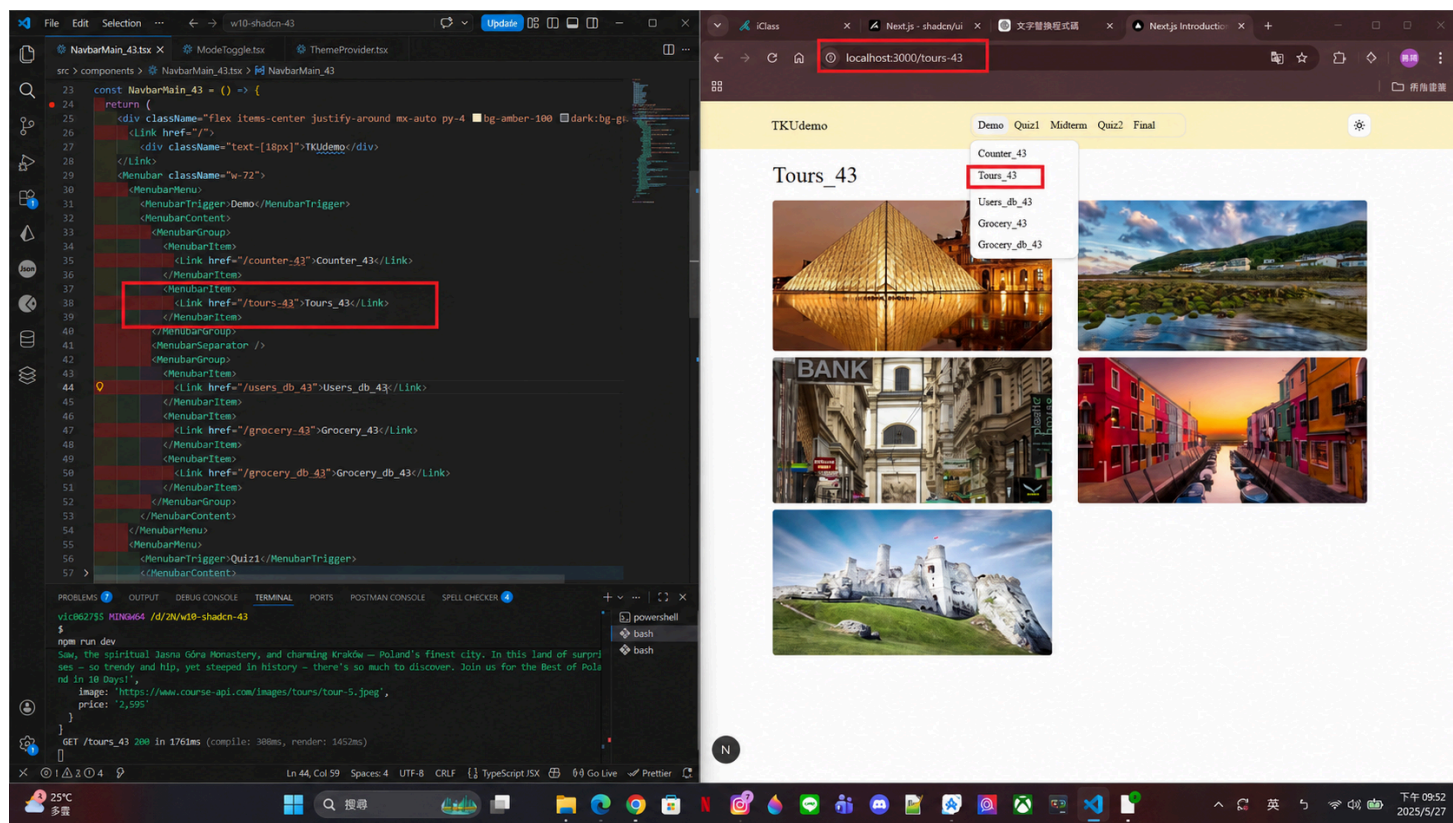

=> dark mode, ThemeProvider setup

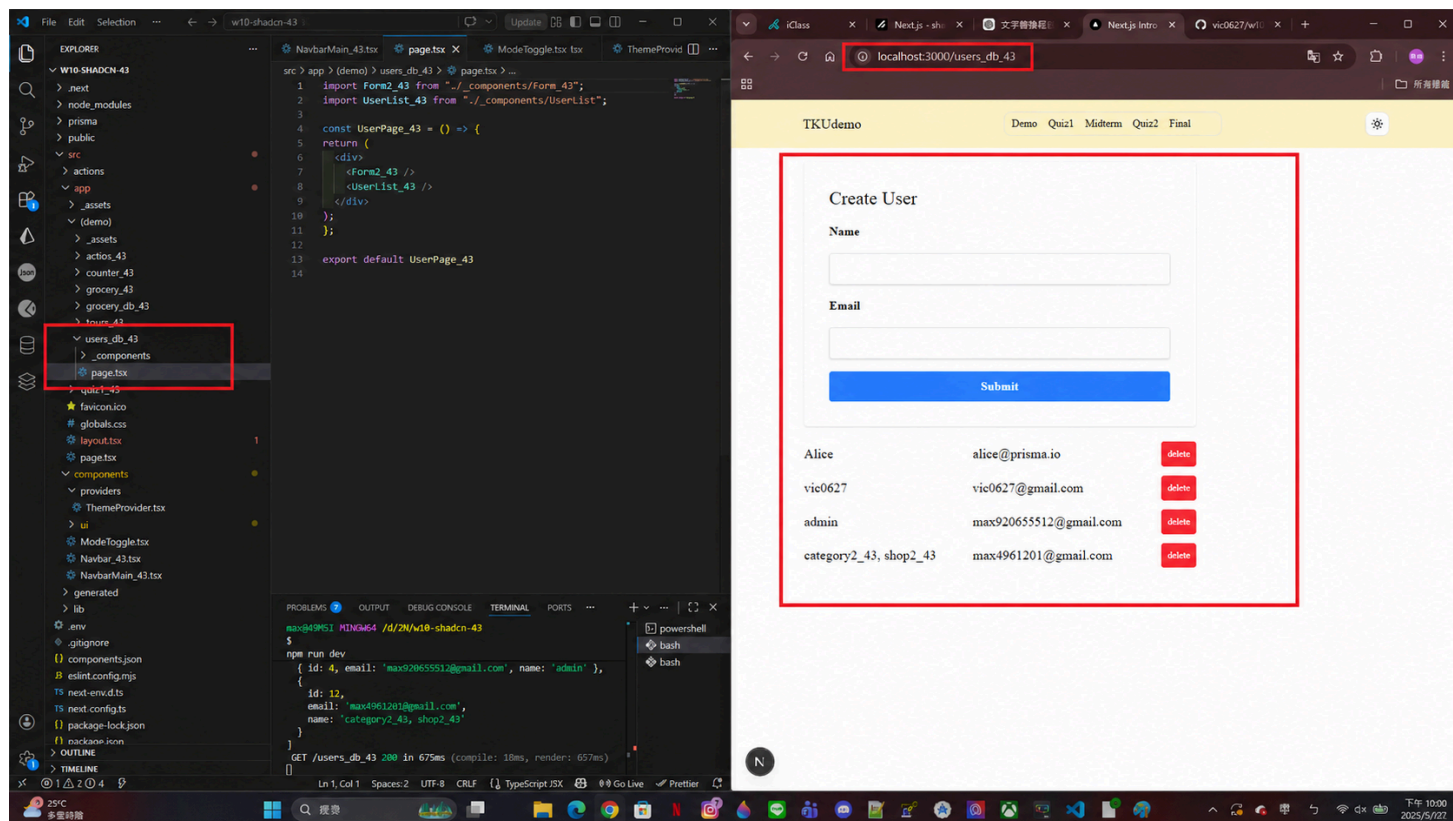

W10-P3: Implement Demo menubar with 5 items

=> Show Tours_43 (local)

=> Show Users_db_43 (local)

=> Show Grocery_43 in Vercel

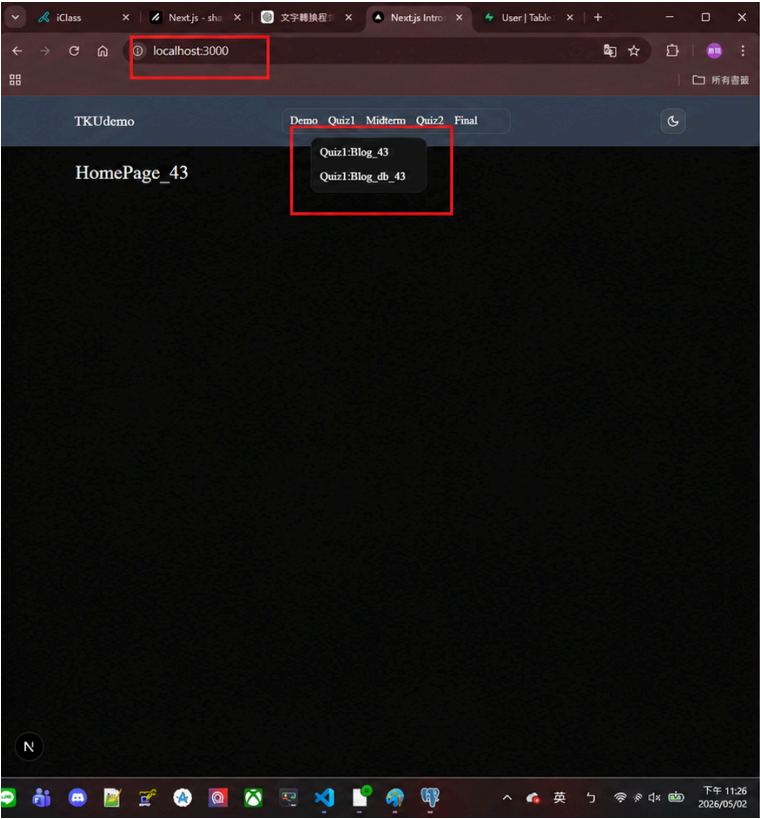

The screenshot shows the development environment for the Grocery_43 application. On the left, the VS Code Explorer highlights the `components` directory, specifically `Form_43.jsx`, `Items_43.jsx`, and `SingleItem_43.jsx`. The main editor displays the `page.jsx` file, which includes the `useEffect` hook for fetching data from the database. The terminal shows the command `npm run dev` being executed. On the right, a web browser at `localhost:3000/grocery_43` displays the application. A toast message indicates "Item Added To The List". The application shows a form with an input field containing "Cheese" and an "Add Item" button. Below the form, a list of items is displayed, including "Cheese" with a "Delete" button next to it.
